

Oil Treatments

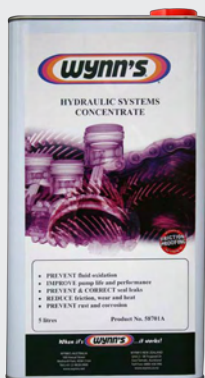

Oil based lubricants are the most prominent form of lubrication in the industry. Standard oil products from major oil companies perform to a set of specifications, applicable to a wide range of applications.

Because of the general nature of the specifications, many users find that those products are inadequate for specific applications, in particular under heavy load and high speed conditions.

Wynn's offers a range of oil treatments to enhance the properties of the engine, gear, differential and hydraulic oils, so that the machinery can run cooler, use less energy, and generate less noise/vibration. A very special heavy viscosity, multi-purpose lubricant, Viscotene, is also included in this range.

WYNN'S HYDRAULIC SYSTEMS CONCENTRATE

- Hydraulic oil anti-wear supplement for hydraulic systems
- Prevents and corrects hydraulic oil system leaks
- Reduce wear and temperature in pumps and equipment
- Preserves hydraulic system cleanliness and prevents corrosion
- Improves seal and O-ring life that cause system leaks
- Suitable for all hydraulic systems using petroleum based fluids

Packages Available

5 Litre Metal Can

Product Number

58701A

WYNN'S HEAVY DUTY CONCENTRATE FOR ENGINES

- Multifunctional engine oil supplement for petrol and diesel engines
- Reduces engine wear, equipment temperature and maintenance cost
- Prevents premature oxidation and degradation of engine oil
- Improves lubrication, oil stability and engine cleanliness
- Provides high level of engine protection, extends oil drain periods
- Extends engine life and increases engine efficiency
- Prevents acid corrosion of bearings and other internal engine components
- Ideal for large heavy-duty diesel engines in harsh conditions

Packages Available

5 Litre Metal Can

Product Number

53362

WYNN'S HIGH PERFORMANCE LUBRICANT SUPPLEMENT

- Extreme pressure anti-wear supplement for heavy industrial lubricants
- Quietens gear and bearing noises
- Prevents welding and galling of gear surfaces under high load
- Reduces friction, wear and equipment temperature
- Smooths limited slip differentials, extends gearbox life
- Increases load-carrying of gears oils and extends oil life
- Ideal for industrial gearboxes and heavy duty equipment
- Suitable for automotive gearboxes, differentials, final drives and oil filled hubs

Packages Available

5 Litre Metal Can

Product Number

59402

WYNN'S CHARGE! MOTOR OIL SUPPLEMENT

- Engine oil supplement for worn four-stroke petrol and diesel engines.
- Reduces engine oil consumption and exhaust smoke
- Improves cylinder compression, lubrication and oil stability
- Reduces engine wear and equipment temperature
- Extends engine oil drain periods and engine life
- Maintains oil pressure and viscosity at high temperature
- Quietens noisy engines, improves fuel consumption
- Ideal for old and worn diesel engines in valuable equipment

Packages Available

5 Litre Metal Can

Product Number

56901

WYNN'S VISCOTENE

- Semi-synthetic adherent multifunctional lubricant
- Tenacious resistance to water wash-off, chemicals and steam
- Extreme-pressure and anti-wear for high load-carrying capability
- Quietens noisy open gears, reduces equipment temperature
- Prevents wear, oxidation and corrosion of metallic components
- Reduces vibration, noise and oil lubricant leaks
- Suitable for conveyors, open gears, chains and belts
- Can be used as lubricant for incidental contact with food stuffs.

Packages Available

5 Litre Metal Can

Product Number

80005
